

State Fleet Greenhouse Gas Emissions Report

State Fleet provides the following information in accordance with the requirements of *Division 2, Section 26AA (5) of the State Supply Commission Amendment Act 2008*.

In 2006, State Fleet commenced a program to offset the carbon emissions of its vehicle fleet. In support of this environmental program, the WA Government embarked on a policy of promoting more fuel efficient and environmentally friendly vehicles. Importantly, the net result has been a reduction in fleet CO₂ emissions and operating cost to Government.

In October 2008, vehicle selection policy was amended to include emission level thresholds. This policy is independent of vehicle fuel type or technology used.

The following table shows the average State Fleet vehicle CO₂ emission rating (i.e. CO₂-e g/km) for each vehicle category at the end of each year from 2007 onwards:

	Passenger Fleet	SUV Fleet	Commercial Fleet	Total Offset
Year	Average CO ₂ -e grams per Km			Tonnes
2007	223.6	257.1	260.5	71,745
2008	216.7	255.4	258.4	75,709
2009	209.6	252.2	257.5	72,122
2010	201.5	247.3	256.5	66,169
2011	194.2	240.1	254.3	62,894
2012	188.1	235.7	252.4	60,196
2013	182.6	228.4	246.7	60,492
2014	178.3	222.4	243.5	60,230
2015	177.5	219.4	243.6	59,613
2016	174.2	211.8	240.3	54,167
2017	171.0	204.6	236.0	51,039
2018	169.7	199.4	232.4	43,439
