

Insurance Duty

Apportionment of General Insurance Premiums

Duties Act 2008

As at 26 February 2016

All Australian jurisdictions have agreed to adopt the same basis of apportionment of premiums where there is likelihood that a nexus to the contract of insurance could be established in more than one jurisdiction.

The attached schedule details the basis upon which the premium paid or payable on policies of insurance is to be apportioned for insurance duty purposes.

The Commissioners of all Australian States and Territories have approved the schedule for application in their jurisdictions, and it also has the full endorsement of the Insurance Council of Australia for use by their members.

Basis of Apportionment

Insurance duty is imposed by Chapter 4 of the *Duties Act 2008* on premiums paid for contracts of insurance, which are contracts that effect general insurance.

Where the insurance also relates to:

- property or risk outside Australia (offshore); or
- property or risk in another Australian State or Territory,

the amount of the premium that is attributable to general insurance is determined by apportioning the premium in accordance with the schedule below.

Notes to the Apportionment Schedule

Where alternative methods are available, the method of apportionment adopted should be based on the method of calculating the insurance premium. For example, where the premium for a public liability contract is based on floor area units, insurance duty should be apportioned in the same manner.

For the purpose of private motor vehicle insurance, the apportionment will be based on the State of registration. However, where the vehicle is usually garaged in another jurisdiction, the garaging address will take precedence.

Apportionment Schedule

TYPE OF INSURANCE	BASIS OF APPORTIONMENT
Aviation Hull, Aviation Hull Third Party Property Liability and Aviation Hull Personal Liability	<p>Where the aircraft, the subject of the insurance, is a high capacity regular public transport aircraft, apportioned on the basis of actual take-offs and landings in the previous year in each jurisdiction of all aircraft covered by the contract.</p> <p>Where the aircraft, the subject of the insurance, is other than a high capacity regular public transport aircraft, jurisdiction of usual hangaring of the insured property or location of the insured property.</p> <p>Notes</p> <ol style="list-style-type: none"> 1. The basis of apportionment will also apply whenever the insured company or any of its subsidiaries operate High Capacity Regular Public Transport Aircraft and Low Capacity Regular Public Transport Aircraft in Australia. 2. For the purposes of this Apportionment Schedule, High Capacity Regular Public Transport Aircraft means a regular public transport aircraft whose certificate type approval permits the aircraft: <ol style="list-style-type: none"> (a) to have a maximum seating capacity of more than 38 seats; OR (b) to carry a maximum pay load of more than 4,200 kilograms <p>NB This definition is contained in regulations made under the <i>Civil Aviation Act 1988</i> (Statutory Rule 294 of 1994)</p>
Baggage	See travel
Bankers Blanket Contract	Apportioned according to the individual contract types outlined in this schedule
Blood Stock	State of (usual) location of the asset
Boiler Explosion	Asset value/sum insured or exposure level for each jurisdiction
Burglary	Asset value/sum insured or exposure for each jurisdiction
Business Interruption	Reasonably estimated profit revenue, fees, rent or other business measurement factor

TYPE OF INSURANCE	BASIS OF APPORTIONMENT
Care Custody and Control on Blood Stock	State of (usual) location of the asset
Cash in Transit	Number of premises Asset value/sum insured or exposure level for each jurisdiction
Company Reimbursement	Salaries and wages, number of people/employees
Comprehensive Crime contract of insurance	Salaries, wages, number of people/employees
Contract Works	Asset value/sum insured or exposure level for each jurisdiction
Contractor Risks	Asset value/sum insured or exposure level for each jurisdiction
Crop	Asset value/sum insured or exposure level for each jurisdiction
Deterioration of Stock	Asset value/sum insured or exposure level for each jurisdiction
Disability – single	Place of residence of the insured/place of registration of business
Disability – group	Place of residence of the insured/place of registration of business
Directors and Officers Liability	Turnover or sales or number of people
Fidelity Guarantee	Salaries and wages or number of people
Fire	Asset value/sum insured or exposure level for each jurisdiction
General Property	Asset value/sum insured or exposure level for each jurisdiction
Home Building and Contents	Asset value/sum insured or exposure level for each jurisdiction
Industrial Special Risk Section - 1 Property	Asset value/sum insured or exposure level for each jurisdiction
Industrial Special Risk Section – 2 Consequential Loss	Reasonably estimated profit revenue, fees, rent or other business measurement factor
